

The IBXflex family of products is designed to provide Equinix customers with non-cage space within, or in close proximity to, an Equinix IBX data center.

These units are designed to support mission-critical, 24-hour operation centers and/or to be used as storage areas for equipment or replacement parts. IBXflex units are equipped with cutting-edge environmental support systems, and a set of highly sensitive security control systems, similar to those found throughout Equinix IBX data centers.

- **IBXflex—Office Space:** designed for Operations Center office space (supports occupancy)
- **IBXflex—Storage Space:** designed for storage and spares (no occupancy)

IBXflex—Office Space

Each unit includes the following: Solid door with pin-proxy card access, 24-port termination panel, shared cable tray access, controllable variable air volume unit with thermostat, carpet flooring, and generator-only power with duplex and/or quadplex outlets. Quantity of power circuits and outlets is based on customer requirements for an additional charge.

- Customers are required to adhere to all Equinix Policies & Procedures in IBXflex as in the IBX itself¹
- Customers will not be permitted to install servers/routers that are designed for commercial purposes. Support equipment only in IBXflex area
- Customers are responsible for providing furniture and fixtures within the office space. All improvements to the IBXflex Office unit require Equinix approval
- All IBXflex users will be issued an Equinix proximity badge with name of company and picture of individual user
- Equinix will have authority to enter IBXflex units upon demand and without notice
- Equinix will not allow customer-provided refrigerators, toasters or other appliances in units or in shared areas
- Equinix will not allow DC rectifiers into IBXflex area

IBXflex—Storage Space

These units are designed for staging/storage, not occupancy. Shared IBXflex—Storage Space units are also available in SV1 & SV3 locations only.
