

## PRODUCTS & SERVICES

# PRIVATE CLOUD

The perfect size for today and ready for the growth of tomorrow. With our solution, you enjoy a pool of computational resources in a fully redundant, secure, and flexible infrastructure, with no surprises in your bill at the end of the month and a contract-guaranteed SLA for the entire virtual environment.

No matter what type of organization, today's CIOs and IT Managers face the same challenges: ensuring proper application performance, access to multiple cloud platforms, managing multiple contracts, contracting services with high SLAs, predictable monthly spending, and promoting environment security, always based on the basic premise of efficiency: do more while spending less. The economy has been a powerful force in the performance and transformation of business processes, especially when investments in cloud computing are significant and the board expects a quick return on investment (ROI). In addition, we know that enterprises can have technical or business requirements that prevent physical structure sharing with other companies, and that meeting those requirements effectively is essential to ensure good business performance.

In our Private Cloud mode, enterprises do not share their physical structure with other companies; it's a cloud of your own, and you can choose its exactly size, configuration, and in which of our Brazilian data centers it will be hosted. Your Cloud is fully integrated with your physical servers and the entire Equinix Brazilian portfolio of services. You can migrate to a hybrid environment quickly and effectively, if necessary. In addition, the SLA for the entire virtual environment is guaranteed by contract and you will have no surprises in your bill at the end of the month.

### Benefits

- Greater productivity, flexibility, and responsiveness
- Predictability of infrastructure management costs
- SLA guaranteed by contract and greater control over critical and confidential data
- Impartiality in the choice of technology (VMware and Hyper-V)
- Communication via VLAN with your physical environment hosted by Equinix
- Monitor your resources directly through the portal, without having to log into the servers
- Create, resize, and manage your virtual servers
- Full integration with the entire Equinix Brazilian portfolio: Firewall, Storage, Load Balance, and others
- Custom projects, in your way and size
- Team of certified experts to manage your cloud

### Hybrid Environment

With Equinix, your enterprise doesn't have to choose between the cloud and the traditional paradigm of physical environments. We offer unprecedented flexibility, security, and reliability to hybrid clouds. Implement the Private Cloud for your base demand, using a custom architecture, with consistent performance and security control. Complement your solution with Equinix Cloud Exchange and have access to all the flexibility of the Public Cloud through a direct connection with leading cloud service providers. Expand your environment dynamically to meet seasonal peaks and unforeseen demands.

### Centralized and intuitive management

Control your entire virtual environment through a dedicated and centralized portal that allows you to easily monitor the use of contracted resources. Create, scale and manage your virtual servers through a simple and intuitive interface. All actions are performed automatically, without the need to interact with the support team.

### Certified and acknowledged technologies

We work with the best virtualization platforms, leaders in Gartner's Magic Quadrant. We are VMware IaaS Powered and VMware Hybrid Cloud Powered certified. These certifications provide increased responsiveness and agility for critical applications, in addition to making access to the cloud more flexible, easier, and cost effective. You can also provision disks on different Storage Tiers, with granular control over the performance level available for each of your applications.

### Why Equinix?

- More than 15 years' experience in managed services
- Access to business ecosystems that allow you to connect with more than 9,800 customers and partners in our data centers
- Be seen and also view partners and vendors, and promotes your business chain with other participants in the Equinix Marketplace
- Secure environments with Tier III, ISO 9001:2008, ISO 27001:2013, ISAE3402 / SSAE16 SOC1 Type II, PCI-DSS certifications, among others
- Access over 1,700 carriers

### About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 52 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies. In a digital economy where enterprise business models are increasingly interdependent, interconnection is essential to success. Equinix operates the only global interconnection platform, sparking new opportunities that are only possible when companies come together.
