

# ACCESS CLOUDS WITHOUT THE RISK

WITH EQUINIX FEDERAL AND F5 YOU CAN CONFIDENTLY MOVE YOUR APPS TO THE CLOUD WITH A SINGLE POINT OF CONTROL

- ✓ Lower costs
- ✓ Heightened productivity
- ✓ Secure access
- ✓ Consistent experience
- ✓ Resilient infrastructure

## REALIZING THE POTENTIAL OF A HYBRID CLOUD WORLD

Migrating existing workloads and developing new apps on cloud platforms offers the potential for cost savings, faster deployment and increased agility. Regardless of the benefits, taking advantage of cloud infrastructure means accepting a number of challenges.

**Architecture constraints:** Many applications are not cloud-ready

**67%** of F5 customers now employ a cloud-first strategy<sup>1</sup>

**Compliance risks:** Safeguard data with the highest levels of security and operational reliability

Concern over security/protection architectures is the

**#1**

reason inhibiting public cloud adoption<sup>2</sup>

**Loss of control:** Multicloud environments can make it difficult to maintain control

**82%** of enterprises are adopting a multicloud strategy<sup>3</sup>

## EQUINIX FEDERAL AND F5 EMPOWER FEDERAL AGENCIES TO DEPLOY MISSION-CRITICAL APPLICATIONS

### Consistent user experience

- ✓ Cloud flexibility and consistent user experience across all your applications, no matter what cloud they may be using

### Secure access

- ✓ Secure access for your users to all applications, workloads and data across your entire hybrid cloud environment

### Single point of control

- ✓ Orchestrate command and control of network traffic and security across all cloud infrastructure from a single point

## THE ELEMENTS OF EQUINIX FEDERAL/F5 CLOUD GATEWAY

### Equinix Cloud Exchange Fabric

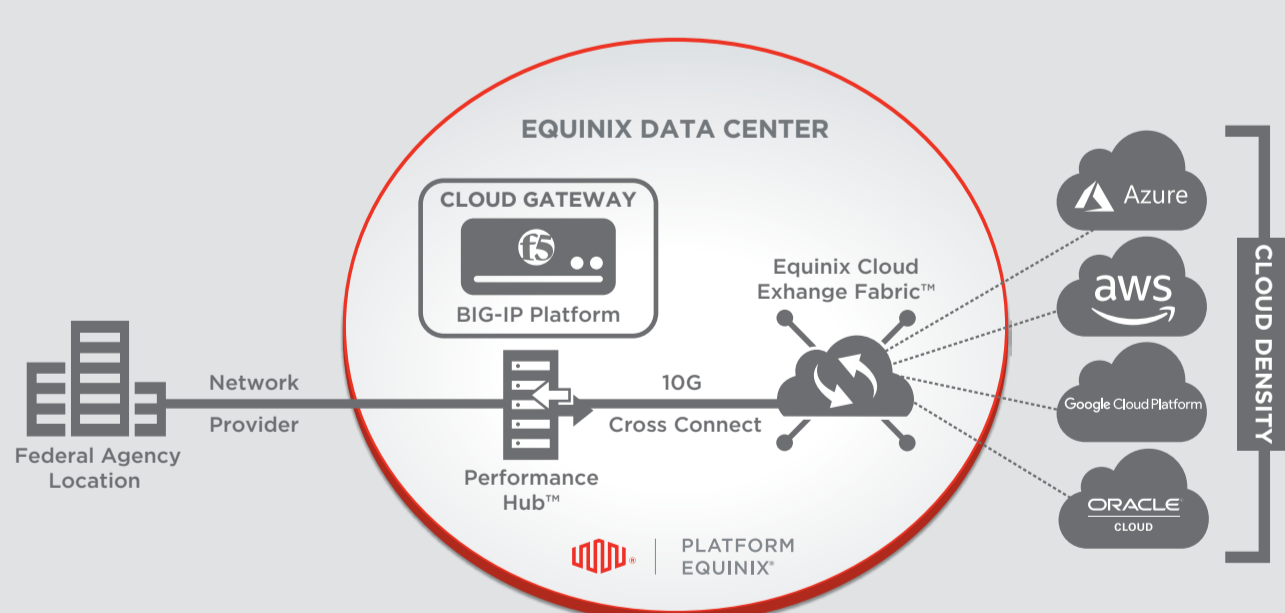

Allows you to directly, securely and dynamically connect distributed infrastructure and digital ecosystems on Platform Equinix® via global, software-defined interconnection

### Equinix Performance Hub™

Brings IT resources to the digital edge, where the physical and virtual worlds meet, allowing you to quickly and safely connect to the people, clouds and data exchanges that a federal agency requires

### F5 Big-IP Platform

Offers market-leading cloud gateway services. Delivered in real time across all workloads, this enables you to leverage the economics and services of multiple clouds while maintaining full application security and control

## EQUINIX FEDERAL | F5 CLOUD GATEWAY SECURITY SERVICES

### Identity Federation

Mitigate risk by providing dynamic, centralized and adaptive access control and identity federation for all applications, anywhere

### SSL Termination & Inspection

Gain critical visibility and deeper intelligence of the traffic on your network and in the cloud that many traditional defenses leave exposed

### WAF/App Protection

Protect your apps, and the data behind them, from evasive, targeted attacks with an industry-leading Web Application Firewall (WAF) offering the highest level of security

### DDoS Protection

Protect your data with a high value, simple-to-deploy, easy-to-manage, next-generation distributed denial of service (DDoS) solution that guards against the most aggressive and targeted DDoS attacks
