

FRANKFURT METRO

CONNECT WITH THE LARGEST INTERNET EXCHANGE POINT IN THE WORLD

Our Frankfurt data centers are business hubs for 935 companies where customers can choose from a broad range of network services from 285+ providers. Equinix Frankfurt data centers are home to a dense concentration of telecommunications, financial services and manufacturing companies. Equinix customers can interconnect directly to customers and partners in their digital supply chain.

Our Frankfurt data centers are among the world's most carrier-dense, thanks in part to our partnership with DE-CIX Frankfurt, the largest internet exchange point in the world. Additionally, we also offer access to Equinix Internet Exchange™, as well as access to the services of several other IX providers. What's more, Frankfurt is one of Europe's leading financial centers and a hub for banking, commerce and manufacturing.

Frankfurt metro facilities

The Equinix metro International Business Exchange™ (IBX®) data centers consist of six buildings with 59,050 square meters (635,000 square feet) of colocation space. Each of our Frankfurt facilities is compliant with key international standards including ISO 9001: 2008 for quality management systems and ISO 27001 for information security management systems.

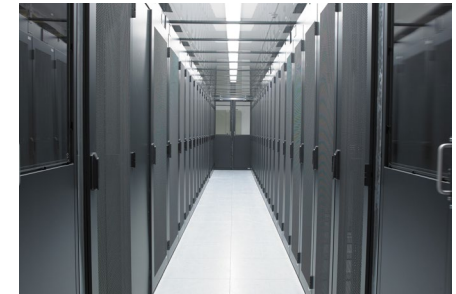

The value of interconnection

- Aggregation point serving five continents which is among the world's most-networked collection of data centers with 935 companies and 285+ network service providers.
- Access to Equinix IX as well as DE-CIX's direct and settlement-free IP interconnection infrastructure with about 600 members in 60+ countries. Further opportunities to connect to the Kleyrex and DataIX internet exchanges.
- Access to Amazon Web Services, Google Cloud and Microsoft Azure German cloud through Equinix Cloud Exchange Fabric™.
- Performance Hub® enables next generation WAN architecture for secure and highly reliable connectivity to 285+ network service providers and 235 cloud and IT service providers.
- Strategic central locations make Equinix Frankfurt data centers ideal locations for colocation deployments.
- Interconnect with top content delivery networks (Akamai Technologies, Limelight Networks, etc.) to improve latency and help improve user experience.
- European gateway to global trading opportunities with 150+ financial services firms and 20+ trading venues participating in Equinix Frankfurt's financial ecosystem.
- Hosts the four main players in the cashless payment market and supports the storage, connectivity and compliance needs of payment services providers.
