MULTI-SOURCING CLOUD STRATEGY

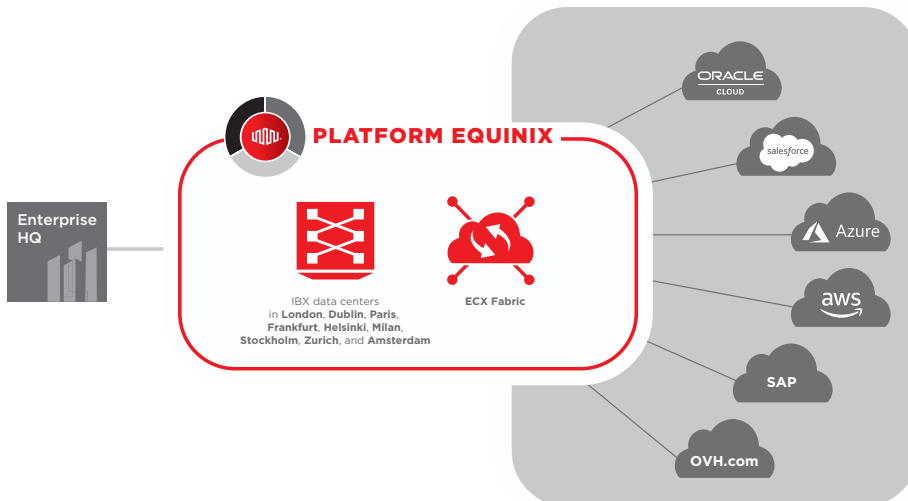

Optimize your multi-sourcing cloud strategy with flexible, on-demand global interconnection

IT infrastructures can no longer keep pace with the rate of change in today's business environment. For most organizations, the only way to stay competitive is to take full advantage of a multicloud or hybrid cloud solution by implementing a multi-sourcing strategy.

The center of any multi-sourcing strategy is interconnection

Our global platform for digital business, Platform Equinix®, enables you to establish an interconnection-first approach at the digital edge—or closest to your users, applications and data. On Platform Equinix, you can employ Equinix Cloud Exchange Fabric™ (ECX Fabric) to directly, securely and dynamically connect distributed infrastructure and digital ecosystems globally via software-defined interconnection.

Available across 25+ locations, ECX Fabric is designed for scalability, agility and connectivity over a self-service portal or API. Through a single port, discover and reach anyone on demand, locally or across metros, to drive your digital future forward. With direct connection to 70+ cloud service providers and hundreds of other participants, ECX Fabric allows you to enhance your multi-sourcing cloud strategy by connecting flexibly and reliably to the places, people and possibilities that matter most to your business.

Benefits

- **Built for scale**—Through a single portal, connect to all your cloud and IT service providers over a software-defined switching fabric.
- **More control**—Select your local and remote connections, with flexible bandwidth options.
- **Reduce costs**—Bring together cloud service providers and users to establish affordable, private, high-performance connections.
- **Minimize security threats**—Privately connect to your digital ecosystems, bypassing the public internet.
- **Reliable performance**—Connect directly to your digital ecosystems for improved app performance and a reliable end-user experience.
- **Increase agility**—Quickly deploy, connect and scale IT resources on demand to any ECX Fabric participant, including your own infrastructure.
- **Global availability**—25+ markets and a repeatable architecture for customized deployments.
- **Rich digital ecosystems**—Reach beyond cloud providers to discover and connect to any other ECX Fabric participant (e.g., networks, supply chains, IT service providers).

About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most-interconnected data centers. In 48 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies.

In a digital economy where enterprise business models are increasingly interdependent, interconnection is essential to success. Equinix operates the only global interconnection platform, sparking new opportunities that are only possible when companies come together.
