

# ORACLE CLOUD VIA EQUINIX EQUINIX WORLD MAP

Equinix Cloud Exchange Fabric™ (ECX Fabric™) allows customers to connect their corporate IT infrastructure directly to Oracle Cloud for a high-performance solution and enhanced user experience, while avoiding the public internet. This improves performance, reduces costs, increases security and leverages cloud computing for more applications.

Oracle Cloud Infrastructure FastConnect scales globally and is available in the following six Equinix locations: Chicago, Washington, D.C., London, Frankfurt, Amsterdam and Sydney.

Remote Access: ECX Fabric is optimized for private, on-demand connectivity to Oracle cloud services even in metros with no local OCI presence. Customers can establish a secure connection to Oracle Cloud Infrastructure via network service providers enabled on the platform. Remote connection to Oracle Cloud is now available via ECX Fabric in six more North American metro areas: Atlanta, Dallas, Los Angeles, Silicon Valley, Seattle and Toronto, and 11 more European metro areas: Dublin, Dusseldorf, Geneva, Helsinki, Paris, Manchester, Milan, Munich, Stockholm, Helsinki and Zurich.
