

PARIS METRO

INTERCONNECT WITH ONE OF EUROPE'S LARGEST CONSUMER MARKETS IN FRANCE'S LEADING DIGITAL CAMPUS

Our Paris data centers are business hubs for 625+ companies. Equinix customers in Paris can choose from a broad range of network services from 105+ providers. After Tokyo, Paris hosts more multinational headquarters than any other city in the world. Leading organizations choose Paris for its geographic position in the heart of Europe and because the city offers access to one of Europe's largest markets.

Paris is a hub for French internet traffic and for the exchange of traffic between the U.S. and Europe. France is also a termination point for many undersea cable systems in the Mediterranean, meaning that low-latency connections are available between Southern Europe, Africa and the Middle East. Equinix Paris colocation facilities enable customers to be part of a rich industry ecosystem. Our eight fiber-connected data centers, strategically positioned in five varied locations across Paris, offer high levels of carrier connectivity. This network density makes Equinix Paris data centers ideal locations to procure bandwidth and optimize network performance.

Paris metro facilities

The Equinix Paris metro consists of eight data centers (one xScale™ and seven International Business Exchange™ (IBX®)) with approximately 519,000 square feet (48,225+ square meters) of floor space. Key certifications include ISO 9001:2008 for quality management systems, ISO 27001 for information security management systems and PCI DSS.

The value of interconnection

- Ability to connect to 625+ customers, partners, content providers, networks and internet service providers.
- Paris is a hub for French internet traffic and for the exchange of traffic between the U.S. and Europe.
- Equinix Paris customers benefit from ultra-low latency routes to Africa, the Middle East and Asia-Pacific due to excellent connectivity to many subsea cables.
- On-demand and direct access to multiple cloud providers via Equinix Cloud Exchange Fabric™.
- Leverage Performance Hub®, enabling next-generation WAN architecture for secure and highly reliable connectivity to 105+ network service providers and 235 cloud and IT service providers.
- Campus connections between PA2, PA3, PA4, PA5, PA6 and PA8x offer the lowest latency connectivity between buildings.
- Interconnect with 65 leading content and digital media (CDM) companies to reduce latency and help improve user experience.
- Connect directly to 50+ leading northern European financial services organizations via the lowest latency connections possible.
- Easily meet compliance requirements, today and tomorrow. Certifications for our Paris data centers include ISO 27001 (information security management), ISO 9001 (quality management) and PCI DSS (card payments specific accreditation).
