# SEATTLE METRO
STRATEGIC LOCATION FOR LOW-LATENCY ROUTES TO JAPAN

Equinix Seattle's interconnection-rich facilities deliver the access to digital ecosystems our customers need to compete regionally, nationally and globally.

Seattle is the largest city in the Pacific Northwest and known worldwide for pushing business and technological boundaries. The region hosts 10 Fortune 500 companies[1] and is famous as a center for everything from coffee to cloud computing. At the heart of the business culture is a drive for innovation sustained by a commitment to superior connectivity that Equinix supports and enables with interconnection-first strategies at the digital edge.

Seattle metro facilities

Our three International Business Exchange™ (IBX®) data centers in the Seattle metro deliver 129,000+ square feet (11,975+ square meters) of colocation space. Customers can gain high-speed connections across the Canadian border while maintaining their IT infrastructure in the U.S. for regulatory and operational efficiency.

Our SE3 facility is home to the FASTER subsea cable, offering low-latency routes to Japan. Seattle customers can privately connect to Google Cloud Platform, Amazon Web Services and Microsoft Azure via Equinix Cloud Exchange Fabric™ (ECX Fabric™) and obtain direct access to the Seattle Internet Exchange. Equinix Seattle is a center of interconnection, industry and innovation, and a global gateway to secure, high-capacity network routes.

To learn more about interconnection opportunities in Seattle, visit the Explorer feature within Equinix Marketplace.
