

Seville Metro

Most-connected facility in the region and a critical link within the local IT community

At Equinix, digital leaders are bringing together all the right places, partners and possibilities to create the foundational infrastructure they need to succeed.

Spain represents a large domestic market with more than 46 million consumers and a world-class infrastructure. Seville is the fourth-largest city in Spain and an important commerce center in the southern part of the country.

Our Seville (SA1) International Business Exchange™ (IBX®) data center is a business hub that enables businesses to build a digital edge alongside the largest industry ecosystems on Platform Equinix®. Serving as a critical link within the local IT community, SA1 is connected to the Canalink cable, with access to Morocco and the Canary islands.

Equinix can accommodate deployments from single cabinets to large, multi-megawatt installations. We also offer flexible configurations and power densities with resilient power supplies to ensure guaranteed uptime.

Equinix Seville data center

The Equinix SA1 data center consists of one building with 3,000+ square feet (300+ square meters) of colocation space. Powered by 100% renewable energy, this premium facility offers scalable technical space and fully redundant power supplies that deliver leading operational resiliency and world-class security.
