

# WASHINGTON, D.C. METRO

## THE LARGEST PEERING POINT IN NORTH AMERICA

Our Washington, D.C. data centers are business hubs for more than 1,100 companies. Customers can choose from a broad range of network services from leading network service providers. They can also interconnect directly to customers and partners in their digital supply chain.

The Washington, D.C. colocation facilities enable customers to be part of a rich industry ecosystem. Our D.C. data centers, located in Ashburn, VA, and Tyson's Corner, VA, are strategic communications hubs for the eastern United States and major communications gateways to Europe. Equinix customers have access to one of the top three peering and exchange markets.

### Washington, D.C. Metro Facilities

Our Washington, D.C. metro International Business Exchange™ (IBX®) data centers consist of 865,000+ square feet (80,375+ square meters) of colocation space. These data centers offer retail and wholesale options for flexibility in colocation options and cost.

To learn more about interconnection opportunities in Washington, D.C., visit the Explorer feature within [Equinix Marketplace](#).

### Equinix Value by Vertical

#### For network service providers

- Largest internet exchange in North America, with direct connect opportunities to leading cloud and content providers.
- Access to Amazon Web Services (AWS) Direct Connect and Microsoft Azure ExpressRoute via Equinix Cloud Exchange Fabric™ (ECX Fabric™).

#### For enterprises

- Performance Hub® to enable next-generation WAN architecture for secure and highly reliable connectivity.
- Capacity to handle large-footprint customers, with room to expand.

#### For cloud and IT services providers

- Ability to connect to customers, partners, content providers, networks and internet service providers.
- ECX Fabric allows you to quickly and easily offer direct cloud access globally.

#### For content and digital media

- Interconnect with top content delivery networks (CDNs).
- Directly connect to leading advertising exchanges; proximity cuts latency and improves performance.

#### For financial services

- A key hub for the world's electronic payments community.
