

SECURE CLOUD IMPLEMENTATION FOR ACCELERATED DIGITAL TRANSFORMATION

Move to the multicloud with flexibility and cost optimization

Together, Evolutio and Equinix solve your performance and integration barriers by evolving your IT architecture from a centralized model to globally distributed, interconnected hubs. Moving your workloads closer to your users, customers and partners, we transform your legacy environment into a multicloud interconnected business. We accelerate your digital transformation with flexible and secure private cloud services, access to the public cloud or a hybrid solution. Our services include network architecture optimization; cloud interconnection, enablement and governance; multiple cybersecurity implementation; and bespoke modernization projects.

The major challenges you face

Minimizing latency

How can you overcome shadow networking, gain flexible SD-WAN solutions to serve your remote offices and customers, achieve global interconnection and eliminate network bottlenecks?

Accessing cloud innovation

How can you access innovation, increase flexibility and accelerate your time to market when restrained by business applications that have been created using non-cloud friendly legacy methods?

Ensuring network security and compliance

When moving to the cloud, how can you protect your network and data exchange, ensuring you achieve compliance and the security of your data and digital assets?

Achieve modernization

How can you implement a cloud-first strategy when constrained by a lack of internal resources, knowledge, tooling and budget?

The key benefits of our joint solution

Network architecture optimization

Our virtual networks services provide 40x connectivity improvements to ensure high-performance, access to multiple cloud providers and interconnections across global industry ecosystems.

Hybrid Cloud enablement

Our flexible, secure cloud access services include personalized cloud adoption consulting, managed operations or government services, resource control, security and multicloud cost optimization.

Multiple cybersecurity

Our cybersecurity includes firewalls, DDoS prevention and fraud detection. We also secure your hybrid cloud from malicious attacks with SASE, providing user identification for safer navigation.

Bespoke modernization projects

Moving you away from CAPEX-intensive hardware and software, we solve compliance issues and offer management services, resource control, security and cost optimization in multicloud environments.

Transition from a centralized IT architecture to globally distributed, interconnected hubs

Our leading capabilities that enable success

Evolutio dynamic networks

We deliver dynamic infrastructures that provide the flexibility and scalability needed to boost your business. Our agile and secure networks enable digital transformation based on centralized control and visibility of your applications, allowing you to select the best strategies for your IT budget.

Evolutio cloud enablement and cybersecurity

We provide consulting services, analysis and implementation of transformation strategies, and hybrid cloud infrastructure that reduce costs and risk. Our cybersecurity services strengthen compliance, helping you analyse vulnerabilities in order to protect your users and data from threats across application and infrastructure.

Equinix Fabric™

Equinix Fabric directly, securely and dynamically connects distributed infrastructure and digital ecosystems on Platform Equinix® via global, software-defined interconnection. Available across 35+ locations, it is designed for scalability, agility and connectivity over a self-service portal or API.

Equinix Network Edge Services®

Select, configure and connect virtual network services at the edge in minutes, without additional space, power or equipment. Equinix Network Edge Services provide virtual network services that run on a modular infrastructure platform, optimized for instant deployment and interconnection of network services.

About Evolutio

EVOLUTIO delivers dynamic networks based on flexible, efficient, managed and secure SD-WAN, cybersecurity and cloud adoption strategies and governance. We assure your success and reduce your costs by transforming your business for the new age.

About Equinix

Equinix is the world’s digital infrastructure company. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. We enable our customers to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.
