

# UNITAS GLOBAL

## FULLY MANAGED HYBRID CLOUD SERVICES TO ENABLE ENTERPRISE DIGITAL TRANSFORMATION

**Solution delivers true end-to-end hybrid cloud deployment to support global cloud adoption and business growth for the enterprise**

### Features and benefits

- Efficiently deploy IT and cloud resources at the edge to boost network and application performance
- Gain better insight and predictable costs around private infrastructure, with flexible access to cloud providers
- Leverage powerful global ecosystems on Platform Equinix to help you keep pace with market leaders and find new growth opportunities
- Streamline the cloud enablement process, decreasing time to market
- Maximize management capabilities to handle business-critical workloads and multiple application requirements
- Customize your solutions to best fit your business needs

As enterprises digitally transform and look to hybrid cloud to achieve cost savings, security and reduced latency, the right partners can make all the difference.

Unitas Global, a leading enterprise cloud solution provider, and Equinix, the global interconnection and data center company, offer a collaborative solution to deliver bundled hybrid cloud services. This offers you turnkey access to a fully managed hybrid cloud service, eliminating the need to build and operate your own IT infrastructure.

Based on the Unitas multicloud orchestration system and available in 200 Equinix International Business Exchange™ (IBX®) data centers worldwide, the offering combines Unitas managed cloud design and deployment services with Equinix advanced colocation and interconnection solutions, including Equinix Performance Hub™ and Equinix Cloud Exchange Fabric™.

### Deploy efficiently at the edge

The bundled solution features unique services that include space, power, network, compute, storage, cloud software, Equinix Cloud Exchange Fabric direct cloud connections, cross connects, bandwidth and management—all dedicated to a single client, offered at one monthly price and managed by a single vendor. You can also take advantage of Equinix Performance Hub, allowing you to efficiently deploy IT and cloud resources at the edge, closest to your end users, which increases network and application performance.

### Dynamic multicloud and hybrid capabilities with an OpenStack framework

Using OpenStack as a common platform, Unitas is able to deliver fully agnostic solutions that integrate with legacy technology. This provides better insight and predictability around private infrastructure costs with the flexibility to connect to major cloud providers, allowing you to meet changing requirements as your business grows.

### Leverage the power of Platform Equinix®

Unitas' multicloud orchestration system is offered on Platform Equinix, a colocation and interconnection platform that extends across 200 global data centers. The offering enables on-demand, customizable options for hybrid cloud deployment as part of an Interconnection Oriented Architecture™ (IOA™) strategy. Equinix customers benefit from a streamlined cloud enablement process that decreases time to market and provides management for business-critical workloads and multiple application requirements.

### Flexibility to match your unique needs

Because enterprises have different business needs, all solutions are customizable with migration, network management, security, disaster recovery and additional managed services.

### About Unitas Global

Unitas Global is a leading provider of enterprise cloud solutions. Each enterprise cloud solution provides clients with custom, highly secure cloud-based IT environments that are easy to consume, fully managed and backed by an end-to-end SLA, guaranteeing application uptime. By offloading day-to-day infrastructure operations to Unitas Global, our clients are able to refocus and optimize their internal IT resources toward their business-centric initiatives. Unitas is headquartered in Los Angeles, with clients and locations spanning the globe. For more information, please visit [www.unitasglobal.com](http://www.unitasglobal.com).

### About Equinix

Equinix, Inc. (Nasdaq: EQIX) connects the world's leading businesses to their customers, employees and partners inside the most interconnected data centers. In 52 markets across five continents, Equinix is where companies come together to realize new opportunities and accelerate their business, IT and cloud strategies. In a digital economy where enterprise business models are increasingly interdependent, interconnection is essential to success. Equinix operates the only global interconnection platform, sparking new opportunities that are only possible when companies come together.
